Hi, All. This technical meeting is for DOF to give an orientation of their proposed Pre-CMS Data Gaps work at the Former Rhone-Poulenc/ Container Properties site. And we likely will be working together a bit in the coming months so this is a good time for introductions. The purpose is to make sure we all are in agreement before DOF gets too far into the preparation. You all know that we are on a tight timeframe so that work can start by mid-April to beat the river levels. These meetings are intended to help reduce the number of comments and limit the amount of changes between draft and final documents.

Since DOF is in the early stages of developing the work plan, I'm expecting this meeting will be informal with not many figures available yet. I'll leave it up to DOF to decide what or how much to present. We will have another meeting on March 22 when DOF can present more details before finishing up and submitting the draft plan to EPA.

Regards,
Janette
